

## "Best Practices" presented at 4<sup>th</sup> EFAC Conference 2007

Reading like a "Who is Who" of the European assembly and handling technology industry, the 4th EFAC Conference 2007 united more than 60 top-level executives for sharing "Best Practices", which was also the general motto of the conference. The conference sessions centered around approaches for achieving excellence in manufacturing, business and technology.

Ample space was given to networking opportunities, such as the Swiss Night Out! on top of the Schatzalp mountain, "speakers' corners" and networking sessions. The next EFAC Conference is scheduled to take place in January 2009 in Davos.

### This is what attendees said about the EFAC Conference 2007:

*"The EFAC conference is really a great opportunity to meet and share ideas with the industrial key players in the field of production of miniaturised products. Through networking, discussion and inspiration, this event is and will be an important feeding ground to improve or generate new business."*

Jan de Louw, Philips Applied Technologies, Project Manager EUPASS. Netherlands

*"As first time participant to the EFAC conference, I was very pleased with the outcome of the symposium. Most of the presentations were answering a preoccupation or an interest I had. The wide variety of speakers coming from different fields in assembly automation enhanced the interest of the conference, in addition to the friendly and warm atmosphere which makes you rapidly belong to the group. I will certainly keep in touch with some of the attendees whom I would have never met without the conference. I will be back in 2009!"*

Daniel H Riviere, CEO, Process Conception Ingénierie SA., France

*"The EFAC conference is a brilliant instrument that combines specific and market relevant topics with excellent networking opportunities. Experts from highly different companies and industries share knowledge and learn from 'best practices' in order to find best solutions for their specific markets and customer needs"*

Steffen Hönlinger M. A., Marketing Manager Automation, SCHUNK GmbH & Co. KG,  
Germany

*"Excellent presentations about the significant future challenges and new solutions and lots of opportunities for networking in the assembly and handling business made the well organized EFAC conference in Davos a highlight in the beginning of 2007."*

Dr.-Ing. Jörg Walther, Executive Vice President Linear Motion and Assembly Technologies,  
Bosch Rexroth AG. Germany

**About EFAC:**

EFAC – the European Factory Automation Committee – is the European network representing the interests of manufacturers of assembly and handling technology. Its main objectives are collecting market and benchmarking data, providing a platform for communication, representing the interests of the industry before the European institutions, public relations and organizing networking events and conferences. At the biennial EFAC Conference in Davos, Switzerland, decision makers from all over Europe discuss the challenges and the future of the industry.
